

# USER MANUEL FOR SEARCH BY QUESTION PROJECT

## 1.SEARCH BY QUESTION ASKING HOMEPAGE

Query Homepage provide to enter the 5W 1H(What,Where,When,Why,Who,How) type questions. If the users want to ask the questions,user should select the question patterns. When users do not select any question type on the page, users can not enter the question to find their answers.In addition, Users select the possible question types under the “Alternative Possibilities” part thanks to Spell Checker if users enter the wrong questions. If users click “About us” link under the page, They can see Search By Question homepage to get more information.

The screenshot displays the 'Search By Question' interface. At the top, the title 'Search By Question' is centered. Below it is a search input field with a magnifying glass icon on the right. Under the input field, there is a section titled 'Select a question term:' containing radio buttons for 'What', 'Where', 'When' (which is selected), 'Why', 'Who', and 'How'. Below this section is another section titled 'Alternative Possibilities:'. At the bottom of the page, there is a light gray footer bar with the text 'About us' and a small icon on the right.

Figure 1.0 Search By Question Main Page

In addition, the main page has a virtual keyboard to right of the search box which is optional feature for the system. According to the figure 1.0, the user selected the “When” question type and we suppose the user enter the “When was Atatürk die?” as in the following figure 2.0.

**Search By Question**
